A postdoctoral associate position is immediately available in Dr. Fumi Katagiri’s laboratory in the Department of Plant Biology at the University of Minnesota (St. Paul, Minnesota, USA). This is a full-time position. The successful candidate will work on the project “Signaling interactions between pattern- and effector-triggered immunity in plants,” which is funded by the National Science Foundation. A Ph.D. in molecular biology, genetics, biochemistry, or related areas is required. Experience in plants, protein chemistry, and/or statistics is desirable. In addition to research components, the project includes a substantial outreach component: the successful candidate will manage a large data generation effort by undergraduate students with the aid of a laboratory information management system. Interested individuals should send a CV and three names of references to Dr. Katagiri at katagiri@umn.edu. Any questions about this position should also be addressed to Dr. Katagiri.

Fumiaki Katagiri, Ph.D.
Professor
Department of Plant Biology
Microbial and Plant Genomics Institute
University of Minnesota
1500 Gortner Ave.
St. Paul, MN 55108.
